

CIRCULON®

CIRCULON®

Cooking solutions catering for any lifestyle

For over 30 years, Circulon has used innovation and technology to provide a lifetime of performance. With features to help the everyday chef produce healthy, time-saving dishes, Circulon also offers a unique hassle-free guarantee.

Of course, it's not technology for technology's sake. The TOTAL® non-stick system - with its integral hi-low groove design - is there to make fabulous recipes easier...and is guaranteed for a lifetime.

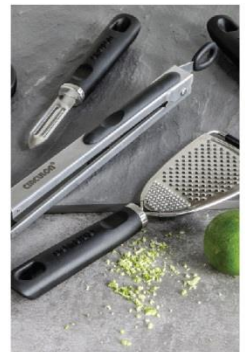

Food cooks and releases on the entire surface of the pan, but raised circles allow a fraction of the cooking surface to take the abuse of utensils, protecting the majority of the cooking surface from abrasion. Unparalleled cooking performance and non-stick durability.

So this makes Circulon cookware perfect for busy families who don't have the luxury of lots of time to get food prepared, but want to sit down and enjoy delicious, healthy meals together whenever they can.

All that technology pays off in real-world practicality too; because those very-same families will also appreciate the outstanding strength and durability Circulon provides across the board.

OUR BRAND PROMISE

If you are not satisfied with the performance of our non-stick system, we will replace it COMPLETELY FREE OF CHARGE. THAT'S THAT'S OUR PROMISE TO YOU.

CIRCULON[®]

Cooking Solution by Design[®]

CIRCULON SYMMETRY

INDUCTION BASE

Circulon's[®] "Hi-Low" is the most durable nonstick technology available. The "Hi-Low" grooves protect the nonstick ensuring that it will last longer than any other nonstick system. Only a small portion of the "Hi" area is exposed to the everyday wear and tear of cooking. The "Low" area remains untouched, giving perfect cooking performance and easy cleaning every time.

FEATURES

- "Hi-Low" nonstick surface allows for fat free cooking and easy cleanup.
- Hard-anodized aluminum is an excellent heat conductor and is twice as hard as stainless steel, for extra durability.
- Safety-grip phenolic (heat-resistant plastic) handles stay cool on the stovetop and are oven safe to 350°F.
- The TOTAL[®] Food Release System is lab tested and proven to be the #1 nonstick system available.
