Over 75 years of service in real-life kitchens

It takes a special brand to meet and exceed its customers' expectations for over 75 years, Prestige products stand up to the day-to-day challenges of a busy family kitchen and help prepare tasty meals whilst always looking the part.

Prestige ranges are for the everyday cooks, they don't create Michelin star cuisine, they just need products they can trust to give them real value for money and a lifetime of fantastic service.

That's what makes Prestige perfect. If they want, the range can grow as their confidence blossoms into new more adventurous cooking techniques.

Or, as their family grows, it can simply get on with the job of helping them bring hearty meal after hearty meal to the table.

Our family is growing in 2018, with exciting new additions to our collection: including SafeCook, our new range of eco-friendly cookware which features a unique vent lid knob that allows steam to escape and helps prevent your cookware boiling over. This year will also see extensions to our Stone Quartz range, with saucepans and an induction suitable cast aluminium roaster joining the family. We are also launching our new Prism kettles and toasters; with a stylish diamond exterior, these items are available in stylish grey and rose gold accents.
